PROFESSIONAL SUMMARY

Aspiring Artificial Intelligence Engineer and Machine Learning graduate seeking an AI Engineer Internship. Strong foundation in Python, Java, database fundamentals, and problem-solving, with hands-on project experience in AI-based expense tracking and medical image analysis. Eager to apply machine learning concepts, learn from experienced engineers, and contribute to practical AI solutions.

EDUCATION

Bachelor of Technology (B.Tech) — Artificial Intelligence and Machine Learning

CGPA: 8.0 / 10.0

PROJECTS

AI EXPENSE TRACKER

- Developed an intelligent expense-tracking system to manage and categorize daily expenses.
- Implemented automated expense classification and spending analysis features.
- Designed a user-friendly interface for monitoring financial activities.
- Generated reports to help users understand spending patterns.

POLYP IDENTIFICATION

- Built a machine learning-based system to identify polyps from medical images.
- Applied image-processing and classification techniques to support detection.
- Focused on highlighting potential abnormalities to support healthcare assessment.

TECHNICAL SKILLS

Programming Languages
- Python
- Java

Database
- DBMS Basics

Areas of Interest
- Artificial Intelligence
- Machine Learning
- Data Science
- Computer Vision

CODING PROFILES
